General Comment

The United States has far larger issues than “AI dominance”. Attempting to focus on such a pathetic and useless endeavor is a kick in the teeth to every American. So many go without housing, food and education- and yet the US wants to focus on a technological pursuit that will destroy creative industries and disrupt the lives of its people. Choosing to focus on AI is the worst choice the United States could make.

Generative AI is massively flawed. It’s built entirely on the theft of pre-existing and human-made media. It produces nothing of value and poisons informational sources. It creates doubt in a person’s mind about what is actually real. The information it puts out is largely incorrect and scrapes away at the internet with zero regard for accuracy. It will do nothing but decrease the value and effectiveness of education. This will, now and in time, undermine the entire structure of our society.

Stop AI. Stop the Action Plan. Focus on the people of this country.
