As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-yqf9-wloa
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5241

Comment on FR Doc # 2025-02305

Submitter Information

Name: J B

General Comment

AI that is built off the work of uncompensated, uncredited individuals is antithetical to the entire system of capitalism. If workers are given no due reward or recognition for their efforts, what reasons will we have to encourage participation in the workforce? Or to continue creating new works at all? Allowing OpenAI or any other AI platform to rip the intellectual property out of the hands of the working class without permission, without compensation, should be completely illegal. It is theft, plain and simple, and should be prosecutable under American copyright law.

OpenAI and similar platforms only exist due to the works created by HUMANS, not machines! And if humans - nay, AMERICAN CITIZENS, are not given their proper respect for their skills and efforts, for what reason will anyone desire to continue creating? New works will grow stagnant, and AI will seal its own downfall with no new fodder to continue learning & growing from. Not only is this unfair to the American creative workforce, it will seal AI's own fate and doom it to an endless feedback loop without new sources of creative information to change and evolve from. The only true path forward is cooperation and collaboration that actually honors the labors of American artisans and respects their legal copyrights, and their right to deny service to AI companies.
