General Comment

Beyond the obvious problem of letting AI and it's associated company have free reign on anyone's work without permission or compensation, this would open the flood gates for any tech company, no matter how little they have to do with AI, to claim they should be able steal everyone's intellectual property with zero consequence. How long do we have until these wannabe thieves start saying "If a soulless AI program can legally take others hard work for itself, surely a human should be legally allowed to do the same?"
