General Comment

As a veteran educator with over twenty years of classroom experience, I believe that AI should have guardrails and limitations.

Scraping or the free use of copyrighted material should be prohibited. The theft of intellectual property hurts Americans.

The use of AI for independent student assignments in education should be regulated.

The adverse environmental impacts need to be curtailed with its usage, specifically with water usage and electrical grids that support AI processing.

It's a mistake to rescind the guardrails placed on AI for the profit of large corporations. It will ultimately hurt everyday Americans in the ways expressed above.
