General Comment

I am writing to oppose any change in regulation that would favor AI development, or investment.

AI is a fairly blatant scam, and investing in it, or allowing it to flagrantly ignore intellectual property laws, represents an incredible misuse of public funds and resources. AI is a financial disaster, and appears to be effectively the next thing in the line of NFT's, and other speculative currency scams that serve only to move vast sums of wealth around by deceiving both investors and the general public.
