Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5298

Comment on FR Doc # 2025-02305

Submitter Information

Name: Eleanor Melton

Email: [REDACTED]

General Comment

I am against the mass scraping of works for the use of training generative AI and believe it would harm more Americans than it would help, especially small businesses and artists who rely on copyright to protect their work and intellectual property. To allow training to go unfettered without any compensation to those whose works have been stolen in order to directly compete with them would render copyright completely useless and destroy hundreds of thousands of jobs. Generative AI has already done irreparable harm to many creative industries, and especially now during a recession, jobs are needed more than ever.

Copyright SHOULD give us the ability to say no, to opt out of the use of our works without permission.
