General Comment

My name is Ethan Fronk. I am a high school sophomore living in Texas.

This action is very disturbing to me. I see the use of AI by my peers to cheat on tests and cheat out of their responsibilities, harming their education.

this bill will encourage the use of AI in places previously not used. More importantly to me, AI companies having less restricted access to data threatens the rights of Artists and Personalities online and in person.

AI is a great tool for furthering society, but the breaking down of regulations does not mean better, more advanced AI models, and I believe this action will make AI models more harmful to the public.

The reason I believe this deregulation presents a danger is in the violation of persons' privacy and property.

If AI is allowed to train on copyrighted material, I believe the copyright has been violated. If reproducing a copyrighted work for profit is to be illegal, so should AI models using protected works to generate random averages of the material for their own profit.

I believe this action plan will further the use of AI models by wrongdoers to harm other people and public figures. Without further regulation, AI can be used to lie about what an individual has said or done. I do not wish to grow up or live in a country that accepts this. There must be protection against these things, and simply allowing AI to be used however it pleases; Will not facilitate a better, safer, and healthier America for her citizens and the world.
