General Comment

AI should not have the right to bypass copyright laws. A corporation stealing images or text owned by artists and individuals for their own uses should be restricted to the same extent, whether the material is used directly or fed into machine learning. AI companies can source their learning material through license free libraries or image libraries that they already have legal access to, not any image or text they can scrape off the internet. I am an artist, I should not have to worry about my art taken by large corporations so they can use my work for their own financial gain at the detriment of individual citizens like myself.
