General Comment

Open AI and generative AI ****cannot**** be allowed immunity or any legal part in any action plan. It has ***already*** been ruled to be copyright infringement. Even if immunity stops lawsuits or copyright infringement in this country, there's no way to regulate it internationally, and the US will still be vulnerable to infringement from elsewhere. It will be bad for US revenue domestically and internationally and bad for exports. Keep Open AI and generative AI away. Don't let it steal any more than it already has
