General Comment

The use of generative-AI is bad.
It's bad that it's incredibly harmful to the environment and drains us of things like plentiful water supplies for drinking and fighting wildfires.
It's bad for artists whose work is fed to the generative-AI system without paying for their work being used (it's blatant plagiarism).
It's bad in that it's easy to fool people who cannot tell the difference between an AI-generated writing prompt or image compared to a real human written prompt or drawn art.
It's bad that it's not efficient.
It's bad that it's not effective.
It's bad that it's incredibly unprofitable.
