General Comment

AI has not made any strides in profitability or promotion of any American company. It is a dead end technology and is being pushed by terrible businesses with no value or ability to make a product without theft of IP. They claim China will focus in AI when all evidence points to the CCP not having a desire to use a fake technology with no use case. This is the same as the Soviets tricking us into studying ESP and psychic powers. It would be foolish to fall for that ruse again.
