## General Comment

AI steals from my work as an academic and as a creative writer. AI must compensate people for any use of copyrighted training material, and AI-generated materials must not be copyrightable. The current methods of obtaining and using training data are in breach of copyright law. In addition, repeated investigations show AI to be inefficient and expensive, particularly in terms of water and energy. I am opposed to any measures making it easier for companies or the government to violate copyright law, put writers out of work, and damage the environment.
