

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-ywar-3p54
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5350

Comment on FR Doc # 2025-02305

Submitter Information

Name: Harrison Hedge

General Comment

I believe that for the betterment of American society and global society that the use of AI should be contained to develop itself via its owner's legally owned property and no one else's. AI is not poised to improve society at large, rather it is a cheap facsimile of the human touch in the world to try to maximize shareholder profits at the expense of the livelihoods of all citizens (the people who actually make the training data). At best it is a silly tool that a lot of investors were bamboozled into spending far too much money on developing, at worst it is a way to fire the entire working class into irrelevance and that later option would prove detrimental to stability, life, liberty, and the pursuit of happiness, undermining the ability of the average American to survive and undermining the foundation of our country and economic system. AI should not be allowed to hurt the American citizenry and I fear the implications of letting it loose on us all will be devastating in the long run.

Thank you for your time.
