General Comment

As an independent creative seeking to make a living off of their art and other work in the future, I urge that these actions are not carried out, as their implementation as it stands would undermine all types of creators and devalue their work by allowing anyone, especially those with vast amounts of capital, to exploit existing copyrighted works for their own gain, essentially stealing from creators both large and small. The economic fallout from such a maneuver would be disastrous in lawsuits alone. I again plead that these actions do not come to pass, as it would hurt every person who has ever made or will make any piece of art across any medium. The world's artists are working under already precarious conditions to make life more bearable for everyone, often barely scraping by as is. I would not see them caused further harm. I hope that these words do not fall upon deaf ears.
