General Comment

Let's be blunt with what you're trying to push here - you're trying to legalize theft at a scale previously unseen, all because big business finds it inconvenient to abide by the same laws that countless creators have found used by corporate lawyers to crush them.

AI companies should not be permitted to simply steal data and laugh off copyright because it's inconvenient to have to pay licensing fees or be barred from blatantly ripping off copyrighted material. AI is not transformative. AI is not creative. AI companies are simply flailing as they realize they've pumped up a hype bubble for their investors and they will fall down a chasm if they aren't allowed to steal from whomever they please.
