General Comment

There's too much ai generated content on social medias, and it's getting to the point where it's hard not to be able to stay away from it. Also, ai generated art and writing in general takes away from actual human creativity. There is a lot of AI content farm slop on YouTube, and not only that, Windows, Apple, and even art programs/apps are pushing AI-powered features that I don't want, and I'm sure a lot of people don't want as well. Please do something about this.
