General Comment

I work as a graphic designer. My work already has been greatly impacted by the theft engine known as generative AI. Removing humanity from processes like art and writing will only serve to dehumanize us all.

I have also worked with AI. Largely, it is unhelpful. It spends vast amounts of resources to create subpar work made by sticking copyrighted material in a blender. Gen AI does not improve my workflow and even using it as a tool in my overall process leads to a subpar final product.

We should not allow AI corporations to steal wholesale from the creative output of the American public. Their intention is only to enrich themselves by stealing from the rest of us.

I do not believe AI holds a place in the future of the United States.
