General Comment

The fact that AI has been largely trained on copyrighted material should disqualify it from being used for commercial purposes of any kind. It depends on stealing from hardworking people world wide. It is shameful for our government to promote its use. Not to mention the environmental impacts of its use. It uses ungodly amounts of water and it doesn't even work as intended. This study showed that ai search engines were incorrect 60% of the time! It is absurd to continue offering this as a valid option. https://www.cjr.org/tow_center/we-compared-eight-ai-search-engines-theyre-all-bad-at-citing-news.php

I am an artist, who's work could very well have been stolen for this garbage technology. I'm happy for ai to be used in fields where it is appropriate but the product being sold to the American public is just embarrassingly bad in every imaginable way.
