Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5428

Comment on FR Doc # 2025-02305

Submitter Information

Name: Ian Lucas

General Comment

As a concerned citizen, it seems that AI is being used as a way to remove jobs in the creative sector of the nation and replace them with servers that consume mass amounts of energy. This plan does nothing but cater to yet another Web 3 tech fad like NFTs and cryptocurrency while putting more Americans out of jobs and not actually saving costs as companies move from paying for employees to paying for licenses and/or increased power bills to use their AI systems. And the end result is getting regurgitated AI slop work made from work from real people fed to the network. AI can't create anything truly new, and fully investing in it only leads to an inbred situation where AI work is fed to AI networks and nothing new is created.

Pushing AI like this only leads to a decline for artists and other creatives. This "AI" is just neural networks and not even true artificial intelligence. AI should be a tool in the tool belt of people making works, not a replacement to the creative process entirely.
