General Comment

All these companies do is steal, they even admitted what their actions are, this shall not pass, they should not be allowed to bypass copyright laws of any kind, they exist for very valuable reasons, if they can't operate with copyrighted works, they should've never started to begin

Letting them take from copyrighted works will allow for further abuse of the law from these companies and much, much more harm to everything and everyone

Stealing should not be allowed at all, no matter what, and if the tech can't exist without stealing from literally everyone, while also doing critical damage to the environment and people, I question why this tech was even allowed to exist in the first place, and all it does is create more alarming problems as it goes, with no real benefits to the world other than making it burn faster and faster, this is no innovation at all, it's abuse and destruction with a sloppy ribbon on top
