General Comment

I do not support AI in any form. AI is a threat to people's livelihoods in the short term and our continued existence in the long term. There is no way that further developing AI will help humanity. This will only end in the quality of life worsening, not getting better. This must be stopped now.

Artists deserve to be compensated for their contributions to society. AI kills real jobs.

If major decisions are to be made in the favor of AI, democracy and the People should be the ones to make that decision- not the President, the President's Administration, or any corporate entity.
