

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-z0cn-hyf0
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5453
Comment on FR Doc # 2025-02305

Submitter Information

Name: M A

Email: [REDACTED]

General Comment

There are no national security implications of american ai companies paying for the content they use and not being able to use content from others without consent. The companies simply do not want to do it. They are not competitive - that's their problem. Perhaps they need new leadership.

In any event, honest and hard working american writers, artists, et al are harmed by their markets being flooded with cheap imitation content that is derived from their own stolen work. Companies like OpenAI propose to steal from artists and writers so that they can sell a competing product. It's like stealing food from a restaurant kitchen and then selling it on the sidewalk in front of the restaurant- and that's a charitable comparison!

It's also worth mentioning that all of these LLM companies are hemorrhaging money - even while they are not paying for copyrighted work! They have had years to make money while stealing copyrighted work and they can't do it. Their product doesn't do what they promise and they can't make it without stealing from people. This isn't hard to figure out. Do not give these companies a free pass to steal. They have to pay for the materials they need like any other business - including legit national security contractors.
