General Comment

I do not believe AI holds a place in the future of the US. As a Freelance artist and illustrator, AI steals from my livelihood and, as an American citizen, allowing AI companies to have full protection from copyright rules give them the ability to profit off of theft from both my work and the work of other hard working American citizens.

AI is overhyped and is fleecing the eyes of the American public. While some AI technologies can help people with issues like coding and coming up with complex solutions, generative AI that OpenAI and Google are pushing are nothing but a scam that just lines their pockets with money, hurts hard working American artists, and fills the Internet with poorly developed slop that makes sources less reliable. America is supposed to be the land of freedom and opportunity, but if OpenAI gets their way with this plan it will take away the opportunity for every artist in the country from achieving the American dream.
