General Comment

They seem to believe that anything and everything on the internet – regardless of who owns it – should be theirs for the taking. They claim that if this administration does not allow them to rewrite the law in this way, it will stifle American innovation.

Instead, it will have the opposite effect. The purpose of American copyright law is to protect the incentive to create and innovate.

If we the American people do not own our creations, and everything we put online will be stolen by Big Tech giants, what will be the incentive to create? If everyday Americans create a new innovative piece of computer code, a new visual design, or a new piece of music only to have it immediately stolen by Google and Microsoft, why bother creating it in the first place? How will we possibly make a living doing these things?
