General Comment

As a consumer and artist, I am against this request as training AI on copyrighted works disservices and violates copyright laws. It will stripe away the copyright of works of organizations, individual artists, and small businesses, negatively affecting revenue and allowing a monopoly of works created by these entities to a small selection of AI corporations. Billions of dollars will be lost by this request as training AI on copyrighted work sidelines revenue to those who make works like movies, art, TV Shows, and amongst other works created by human beings to AI corporations. Accepting this request will be gross negligence and a violation of copyright law, making these protections to these works people have spent their lives on meaningless. That any author of any work cannot claim ownership due to AI stealing their life's work.
