General Comment

Someone comes into your home, takes the hand crafted whatever you worked on for years, takes the letter you wrote to your first love, takes the song that you made up for your best friend in high school that you sang together over and over, takes the documents for the proposal you wrote that changed the profitability of your business... takes it all, uses it for it's own purposes, claims ownership, pays you nothing. That is AI.

In the creative world of arts, letters, design, entrepreneurship AI is so riddle with limitation and mistake it diminishes any project while stealing the work of others.

At present it is a beta in development tech that is unreliable and especially in the industrial world a physical danger to anyone close to its utilization.

Significant regulation is required,

AI action plan... REGULATION
