General Comment

I strongly disagree with the idea of allowing OpenAI to use copyrighted material to train their AI. I don't think AI has a place in the future of the U.S. without laws and guidelines in place, as it steals jobs from U.S. workers and consumes far too much energy for very little gain. Additionally, it should not be used to control sensitive sectors, as AI models often produce unreliable, and often times, flat-out incorrect information. AI should instead be banned from government affairs and strong protections put in place in favor of American workers.

To reiterate, it steals from the livelihood of Americans and profits off theft, while simultaneously increasing energy consumption on our rapidly aging infrastructure. You cannot support that while claiming to be "for the people."
