General Comment

I hereby request further information on this plan.

Gen. AI and LLMs have created a terrible precedent for theft of intellectual property, misinformation, erosion of the arts, anti-intellectualism, privacy violation and perhaps most of all, severe environmental concerns stemming from the sheer amount of energy needed to keep it all running.

Given these concerns, I am extremely doubtful that these technologies are of any benefit to humanity, as they are now. Please remember when developing an AI plan that AI should be used to do well what humans do badly, not badly what humans do well.

P.S., these technologies are effectively pro-fascism.
