## General Comment

As an educator in public school, I can tell you that the idea of AI being needed in some way is harmful. I have already seen teenagers in my classroom attempting to use AI to do their research and work for them, and the results were damaging. They had been given incorrect, sometimes dangerous and bigoted information, some of which ended up being the catalyst for dangerous and abusive conflicts on our campus. In addition, the idea of AI being protected in order to allow such apps (and the people behind them) to scrape people's copyrighted work is abhorrent. Artists and writers must be allowed control of their own work which is often their livelihood and means of literal survival. They do not deserve to have creative work stolen and corrupted, and for a few wealthy strangers to profit from it instead. No such technology needs protection or support by the government of the United States.
