Email: [REDACTED]

General Comment

Artificial intelligence should be used for processing things that will benefit humanity, not maximize corporate profit. Theft of all kinds is out of control in this sector, in attempts to "train" models that otherwise wouldn't be able to function without HUMAN work. These should never have been trained without the permission of the creators. This goes for painting, music, writing, animation, voice acting, etc.

A disgusting amalgamation of data being regurgitated from bits and pieces of human work is not valuable or ethical. You will harm countless professions by removing barriers. These companies need to be held ethically and morally accountable with increased barriers.

We have the means to do so much good. Use AI to try to find medical cures or solutions to complex problems, not steal the livelihood of hundreds of thousands of people. Please.
