

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-z5ji-i5nt
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5569
Comment on FR Doc # 2025-02305

Submitter Information

Name: Steven Bostwick

General Comment

AI technology wastes electricity on an absolutely staggering scale and runs on the back of plagiarized content combed through by impoverished people in other countries paid virtually nothing to look at some of the worst things humanity has ever created. It is inherently unethical.

Even if you don't care about the ethics, bad actors have largely fooled the public into thinking that these are thinking computers capable of reacting to dynamic inputs. This is incorrect. AI programs are systems that are good at guessing the next word in a sentence.

AI integrations have had a negative impact on almost everything they've touched except for the wallets of the tech enthusiasts that have been pushing for their adoption.
