General Comment

As a creator and avid enjoyer of the arts, I believe that allowing AI companies to ignore copyright law is a detriment to everyone. This would actively discourage any kind of sharing of information or innovation, as openAI would be allowed to steal it and make low quality knock offs. Additionally this would allow any individual or company to access vast amounts of copyrighted work, save it, then shield themselves with the excuse that they are training an AI and are exempt from copyright. This would harm many people and stifle more economic growth that the country desperately needs.
