## General Comment

If I pick out words to string together, bother to submit the words in order for people to read, and someone publishes these words of mine, I want the right to the copy. It was my idea and I expressed it. I did not pick out words to teach a computer program what is clever. I can't own individual words but I can own the order. Keep automation out of my cleverness. Computers will never understand why it's clever anyway.

Why not use computers to police plagiarism, because plagiarism is rampant, and it's still a crime. Plagiarism is stealing. Don't make computer plagiarism legal. Don't steal work. If you want me to say it 100 ways I can, but I won't, because that's what you think is better: 100 more ways of saying the same thing, numbly generated into awkward garbage. Computer generated content is making the world worse.

Preserve and protect human generated work.
