General Comment

AI is a technology, not a creator, and creative people have always used various technologies to aid their creativity, but it was still ultimately their own creative process that produced the final work. AI is not the same, and needs to be fed original creative work in order to then generate a derivative work. This is anti-art, anti-artist, anti-human. It will devalue original work such that very few will be able to make a living, unless that original work is protected. Do not give AI companies immunity from the theft of art in order to destroy artistry. It's not worth it. There is zero long-term gain, only short-term profits for a few.
