General Comment

AI and AI development should never, NEVER take precedence over human works and lives. This push for "AI dominance" would allow tech companies unfettered access to all copyrighted material and dilute creative work into unintelligible mush. Also it would allow for more Trump sucking Elon Musk's toes videos and I for one never want to see that again. Without firm and decisive guardrails and rules, this should not take even a single step forward anywhere. If put into action, creative works including literature, film, theater, music, visual art and graphic design will degrade in the US and drive us into even further economic ruin. We will have succeeded into becoming a den of thieves and all our works will be slop and drivel.

Not to mention the inherent biases and flaws built into it possibly leading it to commit massive civil, criminal and financial crime. Giving tech companies free reign to create powerful systems unfettered could lead to defrauding like we have never seen the likes of before.
