General Comment

I am an animation and comics professional of nearly ten years. As generative AI rocketed into the mainstream, I have watched mine and my colleague's work fed into places like OpenAI with zero regulations or permissions. The majority of the tv shows and films I've worked on are geared towards children, and with AI it has been used to flood social media with hate speech, nazi propaganda, and harmful information, all while looking and sounding like the official works they've stolen from.

These big tech companies scrape the internet for art that doesn't belong to them and don't care who it hurts. As an artist I work hard to put forth stories I can be proud of, to share with the world, inspire and grow community. But all these AI systems do is harm small businesses, steal likenesses of performers, and scam the public.

Do not let these companies continue to profit from art they did not create. We need American copyright laws to protect us from predatory companies, so that we can continue with actual innovation in the arts, sciences and technology. Do not create new copyright exemptions that allow Big Tech companies to exploit and steal from creators and everyday Americans without permission, compensation, or transparency.

Thank you for your time.
