General Comment

I do not believe this request should be approved. Generative AI is a glorified plagiarism tool that only operates on stealing and regurgitating the hard work and soul put into real art, writing, performances, voices, etc. created by real artists. GenAI is a grift in a speculative market, similar to NFTs and cryptocurrency, built on false promises and empty words on the results of whatever is made from it. So many cryptocurrencies and NFTs failed to live up to all of the hype and promises the people behind them made because the faults and lies were plain to see by anyone with any sense on how their respective markets operate: genAI is no different from that. GenAI is a bubble that has been blown up to unreasonable and unsustainable proportions, due to so many corporations wanting to use and turn a profit off of genAI. The people, however, have gotten wise to the problems of genAI. At best, consumers do not care for the genAI implemented in all of the services corporations provide and flat out ignore them. At worst, consumers vehemently despise the use of genAI and cease all business with and use of the goods and services provided by those corporations. Nvidia is a prime example of genAI leading to ruin, as seen in their \$600 billion market cap drop. Now imagine just how detrimental the damage will be if OpenAI is granted free rein to plagiarize without any legal protections on copyright holders, how much trouble our already fragile economy face when the bubble finally bursts. GenAI has already harmed countless artists through stolen art and stolen job opportunities (also harmful for our economy), there is no sensible reason to allow it to do further harm on the country as a whole. For the good of the hardworking artists in our nation, I implore you to not allow OpenAI to circumvent copyright law, to not allow OpenAI to steal from innocent artist without due recompense.
