General Comment

AI deregulation and immunity from copyright infringement will destroy the livelihoods of millions of artists, whose work these AI models could not exist without. It serves no purpose than to take money from hard working individuals and line the pockets of corporations and billionaires. To pass this would be a full admittance, as is the case with most recent legislation, that the government does not care about the people it represents, and would rather increase the wealth gap and bring all but the richest into further accelerated economic decline.
