General Comment

All forms of AI should be limited to training and operating on data that is one of: public domain information; purpose-built information whose copyrights or licensing are clearly assigned to AI training/operation by a freely consenting creator in exchange for appropriate compensation; information which is not purpose-built but whose copyrights or licensing are assigned or extended to AI training/operation in exchange for substantive per-use compensation. Anything less respectful to creators and their corporations (e.g., Disney) is unacceptable.
