General Comment

I do not believe that generative AI holds a place for the future of any country let alone America. A “service” that provides no actual utility to Americans, steals from American creators, and must have “guardrails” removed to be effective is not a service we should utilize or be proud of. Generative AI should require proof that it has not scraped from copyrighted or trademarked material which it has never yet been capable of proving. This move is ill sighted. I oppose it as an American.
