General Comment

Generative AI is a solution looking for a problem. It is a massive waste of resources and harms the livelihoods of human creators, as well as the environment, in return for shoddy, inane content.

Please protect the work of real artists, writers, musicians, and other creatives. What they do is an important part of what makes us human. Their emotions and history and perspective make their output infinitely superior to anything a soulless computer program could produce. Taking their work and using it to train LLMs without their permission is theft, plain and simple.
