General Comment

Think of the children - in a world ravaged by the insane energy cost of generative AI, where people no longer respect intellectual property, you are stifling creativity, innovation, and critical thinking.

Please put sensible measures in place to ensure ethical and human-focused development of AI. In all the hyped workshops for AI I have attended so far, I am only hearing people out to make a buck selling how much 'easier' and 'more efficient' AI can make one's work without offering what the actual cost is to do it.
