General Comment

hi. i'm a digital artist and animator just trying to make cool art and get paid to do it. however, letting people make generative ai from OUR WORK and call it "fair use" is gonna make that so much harder. the whole point of art is allowing PEOPLE to express themselves and be creative, putting their hearts and souls into what they make. this generative ai slop can try to RECREATE art, but it will never compare to the real people making real things. last time i checked, ai can't be creative if it doesn't have a soul. what you're allowing people to do with whatever motion you're trying to pass is take our hard work and passion, feed it into an algorithm that regurgitates a disgusting conglomerate of other people's creativity, and pass it off as something only human beings can make. you're letting people who don't care about artists capitalize on us, and it's just sad.
