General Comment

AI companies and developers CANNOT be allowed to use any copyrighted content unless they get the EXPRESS permission of the creator. Be it someones voice, likeness, artwork, writing.

It will end the creative process.

People will become lazy and thoughtless. Instead of learning how to do something they will just rely on some potentially flawed input in an application that may or may not be right, just because some application says so.

People have to be protected. Computers are a useful tool, but you have to use them properly, learn how to use them appropriately.

Hundreds of thousands of people will be affected by this right now.

EVERYONE will be affected by it in the future.

What happens when proprietary information or state secrets gets "accidentally" entered or accessed.

Can a company be trusted with that information? What happens when that company is bought by another company that doesn't have owners in the same country (regardless of whether it's the US, China, Russia, elsewhere).
