General Comment

The concept that Generative AI is immune to copyright law is absurd on many levels. The Disney's and Netflix's of the country will have many ways to enforce their copyrights on these theft machines. Many American small businesses / independent owners will be the ones who suffer this loss of protection. What functional difference is there between AI Art, AI novels, or AI Law briefs? If you would not trust someone with an AI Lawyer, why would you trust them with an AI "Artist" or "Author"? Many Americans will be majorly financially hurt if they cannot get what they are owed from company's trying to steal from them.
