General Comment

“AI” is nothing but overhyped data stealing software. It’s nowhere near as useful or profitable as we’ve been made to believe and can’t even function without ripping off human artists, writers, and content creators. And on top of all that, its damaging to the environment due to the vast amounts of water and electricity needed to power/cool data centers. If anything there should be a lot more regulations surrounding the development of AI technologies, not less.
