General Comment

AI is built upon a database stolen from people's work and personal information who did not give permission to use as companies profit off their data. AI effectively steals from my livelihood as an American and profits off of theft.

AI must be held accountable for spreading bias and misinformation. Relying on AI to do a job makes workers less skilled, and corporations that consolidate their workforce to rely on AI are inherently anti-labor. If you want to keep jobs in the United States, AI needs to be regulated so it doesn't endanger the American people.
