General Comment

Please do not allow the destruction of copyright in any circumstance, especially for generative artificial intelligence. This will allow for theft on such a large scale in regards to creatives, research, science, patents, etc. This will allow individuals to have their work replicated without their consent and allow for theft of creative design and completely ruin the livelihoods of so many and it is beyond disrespectful to allow this to occur.

I'm an artist, copyright offers protection and proper acknowledgement of the person behind the craft and allows them to be adequately recognized. Artificial intelligence is seeking to replicate the value of art and hard work yet it cannot ever because it is because it is made by people which is what gives it value.

Thank you for listening, please do not allow this to happen.
