General Comment

As a writer, my words are my product. I license their use. I will never consent to my product being freely appropriated, stolen, used to train AI, and fed into a scheme to profit via theft. Without my consent to license my work, AI use and training is, by definition, theft and infringement on both intellectual property and my livelihood as an American. Even when compensation is offered, I decline to license my work to companies using artificial intelligence.

If OpenAI or any AI or Large Language Model accesses, processes, or trains on my work, I currently have standing to sue to block this illegal use. I should not have to do that; they should not access it in the first place. But the government must not remove the ability for businesses or individuals to retain their copyright, or to seek legal remedies when products are stolen from us.

AI access, processing, and training should be opt-in only.
