Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5873

Comment on FR Doc # 2025-02305

Submitter Information

Name: Joshua McMichael

[REDACTED]

General Comment

I am Joshua McMichael a working artist out of Pennsylvania. I have history in stage work, renaissance faires, escape rooms, fine art, & illustration. This proposal seeks to see how to not unduly shackle the private center in regards to AI policy, but this very statement disregards the private sector of arts & artists themselves. Already AI development companies scrape and use the work of artists and individuals with no regard to copyright and ownership. This already effects and has effected artists and entertainers across the various art industries. The studio negotiations with the unions in the writers & actors strike are example enough. Being pushed by large studios to sign over digital rights of the artists and actors to their own selves and creations they rely on to survive and make money, that is what was and is forced upon citizens of the United States. Citizens who make up your private sector. So when you consider what is an undue burden on the private sector consider that. AI research that helps us get better at programming, identifying medical problems, support that. The AI that makes up a speculative market of imitating others work, do not support that. That is an undue burden. I permit this statement for public use and display as required to submit this statement.
